

Replication

Steps

Download the dataset and keep the original folder structure.

Follow the requirements pdf

Run python ISE.py from the folder containing the datasets directory.

Check that the script evaluates datasets with 30 repeats per dataset.

Compare the generated CSV files with the CSV files in the results folder of this artifact.

Expected result files

The main files are combined_raw_results.csv, comparison_by_system.csv, comparison_by_dataset.csv, stats_by_system.csv and stats_by_dataset.csv.
